

Biomass Applications

Procal's analysers are used extensively in reporting and control applications in modern Biomass plants. The flexible and reliable instruments form the heart of the systems, enabling CO, NO₂, NO, SO₂, H₂O, CO₂, O₂, dust and velocity to be measured.

The integrated CEM package reports both in ppm and mass measurements. Remote sites also use Procal's on-line remote support capability, enabling high level technical support to be accessed as required.

Gas	Range:
CO	0 – 2,000 ppm
NO ₂	0 – 300 ppm
SO ₂	0 – 300 ppm
H ₂ O	0 – 30 %
NO	0 – 800 ppm
CO ₂	0 – 15%
